# PRECISION DRILLING

## WORLD CLASS 2010

**In 2009**, Precision Drilling improved overall safety performance continuing the drive to Target Zero. These improvements were achieved by all of the thousands of professionals supporting operations in Canada, United States, and Mexico. Congratulations to all employees for establishing new levels of safety excellence. These accomplishments were highlighted through our operations performing:

**96% Lost Time Free**

**89% Recordable Free**

**61% Injury Free**

***Lowest Recordable Injury Rate in History of Company***

**In 2010**, we will continue to reduce risks to our people, learn from the successes, and identify improvement opportunities from our incidents. Our ultimate goal is **TARGET ZERO**, an objective focused toward never accepting injuries as part of the job.

New levels of measurement and awareness will be established to support our **DESIRE TO BE THE BEST**. Three areas of opportunity have been targeted:

-  **TOTAL PEOPLE INJURED** – move toward measuring and eliminating all injuries, regardless of medical treatment.
-  Establish a culture that recognizes and encourages **STEP BACK**.
-  Reduce the pain and suffering of our people through the reduction of **HAND INJURIES**.

I want to reinforce the commitment and support you have toward working safely. In the event that you feel uncomfortable, perceive a risk to yourself, a co-worker, or any individual on-site; exercise your right and responsibility to **STEP BACK**. IDENTIFY when STEP BACK is needed, CONTROL the risks, and EXECUTE the task with the proper control measures in place. All supervisors have my support for a safe work site. I expect this to be provided to all employees.

**YOU HAVE THE COMMITMENT AND SUPPORT FROM MANAGEMENT**

**PLEASE LET US KNOW HOW WE CAN SUPPORT YOU IN ACHIEVING TARGET ZERO**

Kevin Neveu  
President & Chief Executive Officer
