

clarity

Insights to Execution

OVERVIEW

Precision's AlphaAnalytics™ Clarity is a leading edge cloud-based real-time drilling analytics platform aimed at transforming the way drilling data is utilized for both Precision Drilling and its customer's operations. As drilling technology continues to progress, the volume of data points generated are in the billions. In order to effectively utilize this amount of data, Operations and Engineering teams must be armed with analytics to both plan ahead and react in real-time.

THE SOLUTION

By alleviating the need for human driven data compilation, Clarity will transform how users view performance and allow for adjustments in real-time. The Clarity platform simplifies engineering workflows by providing:

- Single source of truth
- Real-time communication channels
- Live customizable views
- Customizable reports

EXECUTABLE INSIGHTS

- Real-Time Performance vs. Targets
- Drilling Parameter Roadmap Insights
- Plan vs. Actual Time/Depth curves
- Well to Well Comparison
- Rig to Rig or Rig Fleet Comparison
